

Input/Output Panel Guide

Presets

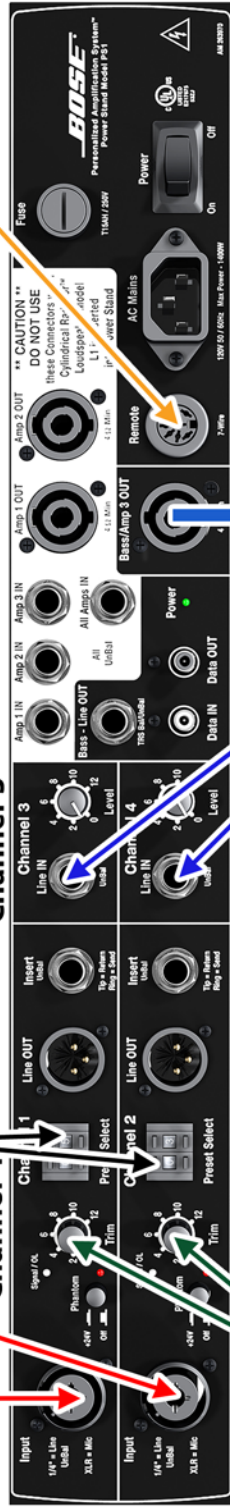

The PS1 power stand comes preloaded with up to 100 DSP EQ presets for matching popular instruments and microphones to the L1 Cylindrical Radiator® loudspeaker. A preset guide inside the Input/Output panel door lists details.

Combo inputs (1/4" or Mic) Plug in here!

Channel 1

Channel 3

R1 remote: Connect to the PS1 and place near you for quick tweaks during performance.

B1 bass module: Use the BLUE cable to connect from the PS1 power stand to the B1 bass module.

Ch 3 and 4: Use these channels to plug in any 1/4" instrument or sub-mixer.

TRIM knobs: For each channel, while playing as loud as you will playing during the show, move the trim up until you see the green level light blink red. From this point, move the trim down a little bit. Repeat for each channel.
